

# YOUR FUTURE IS ELECTRIC.

MOBILITY IS FREEDOM.

gotcha

# A 10 YEAR HISTORY OF MOVING MOBILITY FORWARD.

**Shared mobility isn't new.  
We know, because we've  
been here since the start.**

For 10 years, Gotcha has worked behind the scenes to help cities, colleges, and universities redefine the meaning of mobility. What started with electric ride share has evolved based on the needs of our partners, transforming from one mode of shared transportation into bike share systems, electric scooters, and e-trikes throughout the US.

**While that's where we've been,  
we're more interested in where  
we can go next.**

We use our diverse suite of products to provide partners with custom solutions that bring movement into

a new era—one that's free of parking issues, emissions from single-occupancy cars, and other headaches stemming from traditional transportation.

People have craved solutions like these for years. Until now, they just haven't had a convenient or cost-effective way to make it happen. And that's where we come in.

# RIDES AS DIVERSE AS OUR RIDERS.

**Rooted in real-world problems. Not just scooters.**

Four assets (and counting). An all-in-one proprietary app. The support of a full-time team that's on the ground to change communities for the better (novel idea, right?). These are just a few of the factors that make us a force for good within the shared mobility space.

We're constantly innovating to expand our suite of products, making the idea of micro transit more approachable, accessible, and comfortable for every rider out there. But assets mean nothing without the right partners.

That's why we work diligently to create relationships with people like you, finding ways to tailor our technologies and products to the unique problems you face on the daily.

## **What does that mean?**

We measure our success by the satisfaction of our partners and the number of people we help get where they need to go—not how many assets we have on the ground, tossed around willy nilly.

# IT'S A SUBSCRIBER'S WORLD.

If it doesn't come easy, people don't want it.

We live in a world where convenience is king and our lives are lived one subscription service at a time. It's how we watch TV, exercise, eat, play, and get everything from new clothes to dog treats.

## Our Gotcha Go Pass program will allow riders to:

- Choose how they want to roll using all our e-mobility products
- Eliminate the need for a costly personal vehicle
- Take advantage of a flexible, low-cost pricing structure
- Manage their subscription through a fun, easy app

## But it means as much to our partners as it does to riders:

- Close collaboration to ensure system meets your every need
- Safety, education, and community outreach to effectively bring your system to life
- In-market team that offers real-time support and manages all assets directly
